PROJECT TITLE: **CSE0001- Digital Literacy**

Prepared by:

Name	Tanisha Sethi
Registration No.	25BAI11491
Branch	BTech (AI & ML)
Year	2025-26
Course Code	CSE0001
Date	31 st March 2026

INTRODUCTION

In today's digital era, being digitally literate is essential for students to succeed academically and professionally. As a Student Digital Ambassador, this project focuses on building awareness about digital tools, online safety, and professional communication. Through five structured tasks, I explored various platforms, created digital resources, and understood the importance of responsible online behavior. This project helped me gain practical exposure to tools like GitHub, LinkedIn, and Google Forms while also improving my communication and cybersecurity awareness. Overall, it strengthened my ability to navigate the digital world effectively and responsibly.

TASK1: DIGITAL LITERACY INFOGRAPHIC

For this task, I used Canva to design a digital literacy awareness infographic. The infographic highlights the meaning of digital literacy, safe internet practices, and the importance of maintaining a professional online presence. I included key points such as protecting personal data, using strong passwords, avoiding suspicious links, and maintaining proper email etiquette. The design was kept simple, colorful, and easy to understand so that students can quickly grasp the concepts.

While creating the infographic, I found it interesting to organize information visually instead of writing long paragraphs. However, it was slightly challenging to choose the right icons and layout to make the design attractive and informative at the same time. This task helped me understand how visual communication can be more effective than plain text in spreading awareness.

TASK 2: DIGITAL PORTFOLIO

In this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle. GitHub is used for showcasing coding projects and maintaining repositories, LinkedIn helps in building a professional network, and Kaggle is useful for data science and machine learning practice.

On GitHub, I created a profile README that includes my name, branch, and learning goals. On LinkedIn, I updated my education details, including my degree and institution. These platforms will help me build a strong professional identity over the next four years.

In the future, I plan to regularly upload projects on GitHub, connect with professionals on LinkedIn, and participate in competitions on Kaggle. This will improve my skills and increase my chances of getting internships and job opportunities. This task made me realize the importance of maintaining a digital presence from the beginning of my academic journey.

TASK 3: PLATFORMS

For this task, I used HackerRank to solve a beginner-level coding problem. I completed a basic challenge which helped me understand the platform interface and problem-solving approach. It was a good experience as it improved my logical thinking and coding confidence.

In the second part, I created a Google Form titled “Digital Literacy Awareness Quiz” with five questions, including multiple-choice and short-answer types. I also viewed responses in Google Sheets to understand how data is collected and analyzed.

These tools are very useful academically. Coding platforms help in improving programming skills, while Google Forms can be used for surveys, quizzes, and data collection in projects. This task enhanced my understanding of collaboration tools and online learning platforms.

TASK 4: COMMUNICATION & ETIQUETTE

Poor digital communication can create misunderstandings and negatively impact professional relationships. For example, sending an email without a proper subject line or greeting may appear rude or unprofessional. In one scenario, a student sent a casual message to a professor without proper formatting, which resulted in delayed response and confusion.

This could have been avoided by using a clear subject, respectful greeting, and structured message. Through this task, I learned the importance of tone, clarity, and professionalism in digital communication. Writing proper emails and following etiquette helps in building a positive impression.

TASK 4 : EMAILS

Email 1: Assignment Extension

Subject: Request for Extension on Assignment Submission

Dear Professor,

I hope you are doing well. I am writing to request an extension for the assignment submission due to unforeseen personal reasons. I sincerely apologize for any inconvenience caused.

I kindly request you to grant me an extension of a few days to complete my work properly. I assure you that I will submit the assignment at the earliest.

Thank you for your understanding.

Yours sincerely,
Tanisha Sethi

Email 2: Internship Request

Subject: Application for Summer Internship Opportunity

Dear Sir/Madam,

I am a first-year B.Tech student and I am interested in applying for a summer internship at your organization. I am eager to learn and gain practical experience in my field.

I would be grateful if you could consider my application. I am willing to work hard and contribute positively to your organization.

Thank you for your time and consideration.

Yours sincerely,
Tanisha Sethi

SOCIAL MEDIA DO'S AND DON'TS

Do's

- Use strong passwords
- Keep profiles professional
- Verify information before sharing
- Respect others online
- Use privacy settings

Don'ts

- Don't share personal information
- Don't click suspicious links
- Don't post offensive content
- Don't overshare daily activities
- Don't trust unknown contacts

TASK 5: CYBERCRIME AWARENESS

While researching cybercrime, I was surprised to learn how common UPI fraud and phishing attacks are among students. Many users unknowingly share OTPs or click on fake links, which leads to financial loss.

This task made me more cautious about online activities. One habit I will change is verifying every link and payment request before taking action. I will also avoid sharing personal information online.

Understanding cybercrime has helped me become more aware and responsible while using digital platforms. It is important to stay alert and follow safety practices to avoid becoming a victim.

TASK 5: CASE STUDY (UPI FRAUD)

UPI fraud is a common cybercrime where attackers trick users into sending money or revealing sensitive information. In a typical case, a fraudster sends a fake payment request or pretends to be a bank representative. The victim is asked to enter their UPI PIN or click on a malicious link.

Students and common users are often targeted because they may not be fully aware of such scams. Once the victim shares their details, money is quickly transferred from their account.

The consequences include financial loss and data theft. Victims may also face stress and difficulty recovering their money.

PREVENTION CHECKLIST

- Never share OTP or UPI PIN
- Verify payment requests carefully
- Avoid clicking unknown links
- Use trusted apps only
- Enable two-factor authentication
- Regularly check bank statements
- Report fraud at cybercrime.gov.in
- Call helpline 1930 immediately

CONCLUSION

This project provided valuable insights into digital literacy, online platforms, and cybersecurity. It helped me develop practical skills such as creating online profiles, designing infographics, and writing professional emails. I also learned the importance of safe internet practices and responsible digital behavior. Overall, this project enhanced my confidence in using digital tools and prepared me for future academic and professional challenges.
